the most comprehensive book on how to raise and breed your own poultry flock is now fully updated and expanded the ultimate book for those who want to know everything there is to know about raising poultry gene logsdon author of letter to a young farmer there s no better introductory reference on the joy of home raising chickens booklist the first edition of the small scale poultry flock helped thousands of small scale farmers and homesteaders successfully adopt a practical and integrative model for working with chickens and other domestic fowl based on natural systems in this expanded and thoroughly revised edition readers will find plenty of all new material author harvey ussery introduces readers to his new favorite breed of chicken icelandics describes how he manages his breeding flock using a clan mating system presents detailed information on the use of trapnests and record keeping spreadsheets for evaluating breeding hen performance and provides step by step instructions for construction of an ingeniously designed mobile poultry shelter readers will also find fully updated information and tips on all aspects of flock management including growing and sourcing feed on a small scale cultivating earthworms and grubs as high protein poultry feed brooding and breeding at home implementing manure management using electric net fencing for ranging flocks using poultry as insect and weed managers in the garden and orchard enlisting your chickens as garden tillers and compost makers protecting the flock from predators keeping the flock healthy working with mother hens ussery presents a sustainable and ecologically friendly model that can be adapted for use at a variety of scales his advice and examples throughout the book will prove invaluable for beginner homesteaders growers looking to incorporate poultry into their farm or experienced flocksters seeking to close their loop

small scale poultry production is an obvious and well documented opportunity for poor farmers to start an income generating activity poultry are cheap easy to rear and easy to manage consequently there has been and there is a growing attention and interest in poultry production in villages as well as in peri urban and urban areas throughout the developing world however existing manuals and books either give advice on industrial production systems using improved imported breeds under highly controlled conditions or very simple field guides giving little useful advice on how to rear poultry with profit in mind at village level this manual is based on existing knowledge on how to improve village poultry production systems with relatively few inputs this manual will exclusively deal with free range systems consisting of small

flocks of indigenous chickens or their crosses and smallholder flocks of improved or hybrid commercial chickens poultry production can be divided into four sectors 1 industrial and integrated 2 commercial high biosecurity 3 commercial low biosecurity 4 village and family or backyard poultry the focus here is largely on sectors 3 and 4 but there may be some overlap family poultry as defined by the international network for family poultry development covers sectors 3 and 4 which encompass small scale poultry production there are numerous poultry handbooks which cover sectors 2 and 3 but this hand book has attempted in two manuals to cover mainly sector 3 while not ignoring the great importance of biosecurity particularly in the face of highly pathogenic avian influenza h5n1 it is envisaged that given time some producers now in sector 3 may move into sector 2 the two manuals are pitched at two different levels the trainer s instructor manual assumes that the trainer has qualifications and or experience in a branch of agricultural science but not necessarily in poultry production some of the material included is beyond that necessary to give an initial course in poultry production but may be useful as the farmer progresses from sector 3 to sector 2 the trainee s manual has numerous illustrations and is aimed at a lower level than for the trainer the farmer may be interested in starting a poultry enterprise or is already producing poultry in a small scale commercial or semi commercial opportunistic situation but would like to make poultry farming more permanent the course will allow the farmer to increase his her knowledge and skills and to become aware of a number of important issues e g managing the environment disease surveillance of his her enterprise in order to minimise repetition there is some material in the trainee s manual that is not in the trainer s manual trainers should familiarise themselves thoroughly with both manuals the third manual is for the millions of families worldwide in low income developing countries who keep backyard poultry mainly unmanaged with few inputs but nevertheless are of great importance by providing some security income and high quality protein it is hoped that this manual will make families aware of the possibility of improving output with a minimum of input much of the information has been taken from a range of sources as well as the author s own experience of working in several developing countries over 25 years ideally there should be a small scale demonstration unit or a poultry farm available so that the trainees can see first hand and better understand the main points in these manuals and observe how commercial poultry production should be practiced the importance of community poultry farming is seen as a critical step in alleviating poverty of household poultry keepers empowering women increasing income and moving from a scavenging system to one that is likely to be sustainable

keeping poultry makes a substantial contribution to household food security throughout the developing world it helps diversify incomes and provides quality food energy fertilizer and a renewable asset in over 80 percent of rural households small scale producers are however

constrained by poor access to markets goods and services they have weak institutions and lack skills knowledge and appropriate technologies the result is that both production and productivity remain well below potential and losses and wastage can be high however adapted breeds local feed resources and appropriate vaccines are available along with proven technologies that can substantially improve productivity and income generation these book target the more vulnerable households especially those affected by natural disasters hiv aids and conflict this manual provides a comprehensive and valuable technical guide for those in government service or aid agencies wishing to embark on projects that exploit the potential of small scale poultry production to improve the livelihoods of the rural poor all aspects of small scale poultry production are discussed in this book including feeding and nutrition housing general husbandry and flock health regional differences in production practices are described
